TIMEXPERT C+ (A.G.E.)

Intensive Multi-Correction Luminosity – Firmness - Youthfulness

TIMEXPERT C+ (A.G.E.) is a cosmetic line developed to work against the signs of ageing with the effective action of **Vitamin C (VC-IP)** and **Ume Extract**, capable of inhibiting the effect of **glycation** on the skin.

WHAT IS GLYCATION?

It is a slow, irreversible process that the skin faces daily. It is mainly related with the sugar we eat, but also with environmental stress and UV radiation. Its final stage is characterised by the appearance of the A.G.E.: molecules that rapidly deteriorate the condition of the skin.

When the A.G.E. accumulate on:

- **The Dermis**, the collagen and elastin fibres degenerate, the skin loses suppleness and firmness, colour and uniformity.
- **The Epidermis**, a pallid tone of the skin appears, known in Japan as “kusumi effect”.

The **TIMEXPERT C+ (A.G.E.)** anti-glycation products have been designed to preserve the integrity of the skin and develop a fast multi-correction action that unifies the tone, improves the colour and provides luminosity and firmness.

ANTI-GLYCATION COSMETIC TECHNOLOGY

The specific formula of **TIMEXPERT C+ (A.G.E.)** combines the following ingredients to preserve and alleviate the ageing caused by glycation on the skin:

- **Ume Extract**

A type of Japanese plum that contains twice as much proteins, minerals and fats than other fruit. Rich in calcium, iron, phosphorus and organic acids, it has a powerful anti-glycation effect.

- **Vitamin C Derivative (VC-IP)**

Once absorbed, it decomposes in the form of Pure Vitamin C, with all its benefits.

- **Active Fragrance**

Fresh and heady, based on the extracts of olive leaves and spices that help the activity of “capturing free radicals”.

All the products have been dermatologist-tested.
